Together, Shaping the Future of AI & Data Governance

Introducing the AI & Data Governance Summit 2025 (ADG) APAC's premier AI & Data Governance conference. AI is transforming data and analytics, reshaping how we handle governance, privacy, literacy, and business needs.

At the AI & Data Governance Summit in Sydney Australia, stay ahead of the curve, dive into the latest insights, join the current discussions, and explore cutting-edge technology solutions.

Gain actionable insights and real-world strategies to tackle AI and data governance challenges. Whether you're dealing with ethical AI, enhancing data privacy, or improving data literacy, ADG is your must-attend event for all things AI and Data Governance.

Why Attend?

- Learn from world-class experts on AI and data governance.
- Explore practical solutions and tools to manage data, improve security, and ensure ethical AI.
- Gain actionable strategies through real-world case studies and discussions.
- Network with industry leaders, decision-makers, and peers shaping the future of AI and data governance.

Our 2025 Themes:

- **Data Governance, Data Quality & Literacy:** Learn how to implement practical data governance and quality frameworks that create a strong foundation for trusted AI. Build data catalogues that people will actually use, improve data literacy across your teams, and establish clear ownership for data throughout your organisation.
- **AI Governance & Ethics:** Explore practical frameworks and strategies to ensure AI is trustworthy, ethical, and delivers real business value. Learn how organisations are managing AI risks and putting effective governance in place.
- **Data Protection & Data Risk:** Discover how leading organisations are protecting sensitive data and managing data risks across the entire lifecycle. Get practical insights into upcoming regulatory changes, including CPS 230, and explore how to stay compliant.
